

Matèria

Miranda López Ortega

No estaba ahí, pero me acuerdo

20.09.2025

curated by Gianni Politi

Alongside *Luci di via*, Matèria is proud to inaugurate a new chapter of its *Vitrine* program, an ongoing initiative that transforms the gallery's street-facing window into a space for experimentation and direct engagement with the public.

Highlighted artist Miranda López Ortega (Guayaquil, Ecuador, 2002) makes way for a cycle of curated spotlights dedicated to budding artists, selected under the guidance of artist Gianni Politi. Conceived as a first step into the professional context of a commercial gallery, the project provides a platform for emerging voices to gain visibility while inviting the public to encounter new artistic practices in a direct and accessible format.

The initiative underscores Matèria's commitment to supporting the next generation of artists and to cultivating opportunities where experimentation, dialogue, and accessibility intersect.

Miranda López Ortega (Guayaquil, Ecuador, 2002) is a visual artist based in Rome. Her practice integrates painting, drawing, and writing with a theoretical inquiry into identity, memory, and the duality of existence. Through a rigorous and introspective approach, she investigates the layering of self and reality, creating self-referential systems composed of metaphors, repetition, and serial structures. Graduated in Painting and Visual Arts from NABA in March 2025, her work is deeply influenced by concepts such as vibrant matter and rhizomatic development, which inform her exploration of the relationship between interior and exterior, visible and invisible. Introspective analysis is central to her practice, serving as both an expression of identity and a means to understand existence.
